DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method of treating cancer in pets employing a food composition comprising a vitamin D analog, classified in class 514, subclass 167+ and class 424, subclass 442.
- II. Claims 13-17, drawn to a food composition comprising a vitamin D analog, classified in class 514, subclass 167+ and class 424, subclass 442.

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case cancer in pets can be treated through surgical procedures.

A telephone call was made to John S. Beulick to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
